“I would highly recommend...”

“The Discovery process has been very helpful to our young adult small group. It allowed us to see how we can be most effective at doing what God has called us to do. Some of us have changed career paths since we did the process less than two years ago. Others of us have received promotions at work, and still others of us are dreaming about starting new church services and planting churches. It has allowed us to hone in on our strengths and grow by focusing on our God-given gifts. I would highly recommend this process.”
